OBJECTIVE

A highly motivated and detail-oriented **Diploma in Vocational I.T.** student with hands-on experience in full-stack web development. Skilled in building dynamic and secure web applications using **Node.js**, **React.js**, and **MongoDB**.

Passionate about learning new technologies, problem-solving, and contributing to innovative projects. Seeking an opportunity to leverage my technical skills and enthusiasm for web development to contribute to the growth and success of a forward-thinking organization.

EDUCATION

Sun Flower Public School

High School - 94.2%

2022

Dayalbagh Educational Institute

Diploma in Vocational I.T. - 7.02 CGPA

2022 - 2025

PROJECTS

Blogpost

Technologies Used: Node.js, Express.js, React.js, MongoDB, bcryptjs, Tailwind CSS

- Developed a **full-stack blogging platform** that allows users to register, log in, and create/manage blog posts.
- Implemented **secure user authentication** using **bcryptjs** for password hashing, ensuring the safety of user credentials.
- Designed the frontend with **React.js** and styled the UI with **Tailwind CSS** for a modern and minimalistic look.
- Built a **RESTful API** using **Express.js** to handle CRUD operations for blog posts.
- Utilized **MongoDB** for data storage and **Mongoose** for efficient querying and management of posts.
- **Deployed locally** for development and testing.

Shortly

Tech Stack: HTML5, CSS (Custom Properties, Flexbox), JavaScript, RapidAPI, GitHub Pages

- Developed a responsive URL shortening web app as part of the Frontend Mentor challenge.
- Integrated a third-party URL shortening API via **RapidAPI** to handle user input and return shortened links.
- Implemented key features including short link validity duration, one-click copy to clipboard, and form validation with error messaging.
- Utilized **mobile-first design principles** and **semantic HTML5** for accessibility and optimized layout across device sizes.
- Hosted the live project using **GitHub Pages** for free static deployment.
